EXPERIENCE

Artificial Intelligence Intern   *August 2024 - Present*
PT. Salam Pacific Indonesia Lines (QHSE) – Jakarta

- Spearheaded 3 AI projects using YOLO and OpenCV to support QHSE operations. including real time object detection.
- Enhanced model performance with data augmentation, achieving 87% precision, recall 79%, and f1-score 84%.
- Collaborated with 2 departments to research AI applications, that potentially saving cost and enhanced operational efficiency.

Laboratory Assistant for Data Mining Course   *March 2024 – July 2024*
Buana Perjuangan University – Karawang, West Java

- Mentored over 200 students in applying machine learning algorithm and resolving code issues.
- Evaluated and graded weekly assignments, ensuring precision in data processing and model development using Python.

Research Assistant   *June 2023 – December 2023*
Buana Perjuangan University – Karawang, West Java

- Conducted comparative analysis of 5 machine learning algorithm to classify heart disease and stroke disease patients.
- Preprocessed large datasets over 100 columns and 600k rows of data and implemented oversampling technique (SMOTE - ADASYN) to solve imbalance data problem, achieving best performance 0.868 AUC score.
- Co-authored 2 research papers published in Sinta-indexed journals (Sinta 3 and Sinta 4).

EDUCATION

Bachelor of Computer Science   *September 2020 – June 2024*
Buana Perjuangan University – Karawang, West Java

- GPA: 3.51 / 4.00 (Cum Laude).
- Secure Incentive Award for Scientific Paper during the 2024 Student Creativity Week.
- Earned Silver Medal in Artificial Intelligence at National Scientific Paper Competition held by Brawijaya University (2023).
- Won 1st Place in KKN Scientific Paper Competition, Buana Perjuangan University (2023).
- Led the Class as Coordinator for 3 years and Laboratory Assistant for 6 months, mentoring over 200 students in Data Mining course.

PROJECTS

General Chatbot with Llama 3.1   *October 2024*

- Developed a web-based chatbot using LLM LLama 3.1 8B, optimized with Groq as an engine for fast local inference, capable handling up to 400.000 tokens per day.

Air Quality Analysis Dashboard   *September 2024*

- Analyzed air quality data (2013-2017) and implemented a Streamlid-based dashboard for visualizing key insight using SMART analysis.

Deep Learning Methods for Classify Welding Quality Image   *May 2024 – July 2024*

- Built a CNN model with VGG16 for welding image classification, achieving 98% of accuracy in balanced data conditions.

ACTIVITIES

Workshop Committee, PIC Equipment Division "Trap Hackers with Honeypots"   *June 2023*
Buana Perjuangan University – Karawang, West Java

- Coordinated 5 team members in the equipment division and worked with other departments to ensure seamless event execution and proper tool management during the event.

CERTIFICATION / PATENT

- **Data Analysis with Python** – Dicoding   Sept 2024 – Sept 2027
- **Data Science** – Dicoding   Sept 2024 – Sept 2027

- **SQL Fundamentals -** Dicoding — Sept 2024 – Sept 2027
- **Machine Learning for Beginners** – Dicoding — Sept 2024 – Sept 2027
- **Python Programming** – Dicoding — Sept 2024 – Sept 2027
- **English Proficiency Certificate (442/600)** – British Council — Apr 2024
- **Patent: Implementasi Algoritma CNN Terhadap Aplikasi Klasifikasi Kesehatan Citra Bulir Padi "BRINJI"** — Aug 2023

SKILLS

- **Python Programming Language**
- **Machine Learning**
- **Deep Learning**
- **LLM**
